TO OUR CUSTOMERS:

At BUS SERVICE we've built a company whose values have shaped a tradition of excellence and quality. Everything we do is directed toward the satisfaction of present and future customers. Quality is defined by current expectations, as well as, future needs. Our existence depends solely on providing superior products and service to our customers. We take pride in our credibility, the relationships that we build and our reputation that distinguishes us from our competitors.

This catalog is designed to provide you with a brief overview of the types of products we sell and service. Within each category we have provided a cross-section of the types of products we sell. These categories in no way contain all of the different products that we sell within each category. In addition, we are continuously adding to and updating our inventory in our catalog and in our online store.

We hope that you find this to be a useful reference. In addition to this catalog, we have a website, an e-mail address for additional information and contact,and an online store for internet purchases. You can find our website at: http://www.busfixx.com. We are now doing an ongoing technical blog which is available by going to: busfixx.blogspot.com. Previous newsletters are available online. The newsletters can be printed for your future reference. Be sure to sign up for our emails. They contain updates to our blogs, news items, and coupons for discounts on purchases.

We would like to thank you for the opportunity to be of service to you. We welcome your comments and suggestions.

Special Note: We are a Commercial Member of the Family Motor Coach Association– Membership# C8624.

Special order items cannot be returned. Unauthorized returns are subject to a 25% handling charge. All returns are subject to final inspection. Any remanufactured item which has been tampered with will be considered non-refundable. Bus Service reserves the right to deny credit based on condition of returned parts. All returns must be shipped freight prepaid.

ABOUT OUR REMANUFACTURED COMPONENTS:

What separates our remanufactured components from our competitors? It's all in the process. Every component has been completely disassembled and completely remanufactured in-house individually.

We begin our remanufacture process by visually checking for external damage. We then clean the product thoroughly by way of special cleaning solvents and machines.

All pertinent parts are then "bead-blasted" before being evaluated for re-use or replacement.

Parts are then inspected and measured for tolerances to insure that they meet the established manufacturer's specifications and criteria. Any and all items not meeting the specified criteria are discarded. All gaskets, seals bearings and o-rings are replaced.

The product is then assembled using factory authorized component parts and criteria.

It is then tested so that it either meets or exceeds original manufacturer's specifications.

All assemblies are tagged and tracked with our "BSI" number.

The "BSI number" and test results are logged in our computer so that it is traceable. The actual repair order detailing the remanufacturing process is filed.

Records are maintained in-house for a minimum of three years.

The next page features a partial list of remanufactured components which are in stock. If you need an item not currently listed, please feel free to contact us.

Remanufactured Components

In many instances, there is up to a 50% difference in price between new and remanufactured. Performance and length of service should be the same as new. Experience has shown us when remanufactured correctly, remanufactured components can and should be expected to perform at the same level as factory new. Our available components are listed below.

INFORMATION ABOUT STARTERS...

A note about starters…. Fall and winter bring cold weather conditions. These conditions require more from your starter. It takes more torque to overcome the viscosity of the oil and the increased friction. With that in mind, there are several things you can do to reduce the stress on your starter as well as your engine. To reduce the cranking load:

1- Install an engine block heater.
2- Use appropriate oils for the outside temperatures.
3- Turn off sources of unnecessary electrical draw.

Other things to keep in mind:

1- Make sure the proper gauge cables are used.
2- Keep battery posts/studs clean and free of corrosion and keep them greased.
3- Always make sure the battery cables are in good condition including all cabling to the starter.

THE MOST ADVANCED TEMPERATURE CONTROL HEATING SYSTEM FOR COACHES….

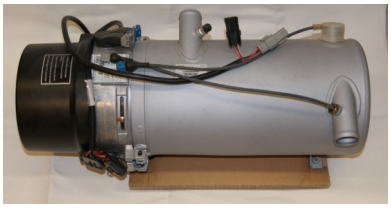
The purpose of supplemental heating is to eliminate the need to run your engine and/or generator on a continuous basis. A Webasto unit provides engine preheat, supplemental interior heat, maintains optimal engine operating temperature and accelerates window defrosting and defogging. One feature included is variable temperature control system. In addition, the nozzle burner system provides instant heat and low maintenance. It has a heavy-duty modular design which is based on market experience and customer requirements. Integrated control unit provides total protection from the elements. Electronic ignition system ensures reliable starts and low power consumption. Its compact size makes it the lightest and smallest heater in its class. Units are available with enclosures and can be installed in our shop, upon request. A complete inventory of parts is available. We are the oldest certified sales and service facility for Webasto Thermosystems in the United States. We are also a certified warranty facility for Aqua Hot systems.

DBW2010: This heater has been long tested in the truck and bus industry. This compact unit produces 45,000 BTU/hour. Part #89235B 12 Volt Basic Heater

Scholastic DBW2010: This heater is designed especially for school bus applications, both 12 and 24 volt. Comes equipped with roll-over lock-out feature, single line fuel pump and high capacity MP circulating pump.

DBW2020: This unit has set itself apart in the heating industry. It is capable of producing 80,000 BTU/hour. Part #920072 12 Volt Basic Heater

THERMO 300: This is the new generation of Webasto heaters for Coach and Transit markets. It produces 104,000 BTU/hour and provides warmth in the harshest of conditions. Part #63650B Basic Heater



DBW300: The **DBW 300** 105,000 BTU hydronic heater is the largest of all of the Webasto hydronic heaters. It is available in both 12 and 24 volts.It uses a 2-3/4" rigid exhaust system, and a 1/4" supply and return fuel system.

Air-top 2000ST: 12/24 VDC Can be used with gasoline, diesel, or LPG. These units are designed to heat the cab and clear the windshield. The heaters operate independent from the vehicle engine and are connected to the fuel tank and to the electrical system of the vehicle. Their use is possible in vehicles with water or air cooled engines.

Thermo 90ST: This unit is the most compact in its class. Using Webasto's "new technology, it is a unique auxiliary heater equipped with a weather resistant control unit and self -diagnostics system. This versatile heater is available in both 12 and 24 volts.

TLS17: This unit is an engine pre-heater which can eliminate cold starts altogether. It provides 17,200 BTU maximum output/ heating cycle. Made for reliability and performance, Webasto coolant heaters extend engine life.

In addition to complete units, we are the largest stocking distributor outside of the Webasto factory. We also have remanufactured units built to original OE specifications, in stock, for immediate exchange. We service units and rebuild individual units. We also design and assemble units for specialty applications.

ENGINE PARTS

Bus Service is dedicated to serving the transportation industry. What makes us stand out amongst our peers is our extensive, 'hands-on', experience. We know what it takes to keep your fleet running and are your partners in this challenge. Keeping purchasing costs down, yet knowing you are getting quality parts from a supplier who backs you up with a 100% guarantee is our primary goal. No one can offer the extensive engine program that we have.

Our engine parts guarantee is far greater than Detroit Diesel, Cummins or Caterpillar!

With that in mind, we would like to take some time to introduce our new line of engine parts……..

We are pleased to announce our complete line of aftermarket replacement parts for Detroit Diesel engines. We have been worldwide suppliers of diesel parts for over 30 years. Our name is trusted in the diesel industry due to the availability of innovative products such as new smokeless injectors which reduce pollutants and save fuel. We serve heavy duty diesel industries including trucking, transit, railroad and marine, just to name a few.
